### Program Changes - Listed by College/School

#### School of Architecture - Changes to the Bachelor of Arts in the Architecture Curriculum

**Faculty Contact: Adam Drisin**

1. **Change:** remove ARC 4910 Research Methods (3Cr), and replace it with the student's choice from any 3000-4999 level art history (ARH) course offering.

   **Rationale:** This course's curricular purpose is no longer needed as it neither leads to an undergraduate thesis nor is such in-depth methodology-based content required within an undergraduate non-professional architecture curriculum. In its place, we propose an art history course that covers - as a secondary component - art-historical methodology while delivering art historical content as primary content. This change reflects a logical and desired component of a Bachelor of Arts in Architecture degree curriculum.

The Graduate Program in Architecture prepares students for research and practice in the field of architecture. It includes pre-study of design, advanced technologies in architectural practice, and the history and theory of architecture.

The Program offers three tracks to students from various academic backgrounds. Students with no previous experience in architecture follow the Professional Track 3, consisting of 115 credit hours to be completed in approximately three years. Students with an undergraduate four-year degree in pre-architecture follow the Professional Track 2, consisting of 60 credit hours to be completed in approximately two years. Students with a professional five-year undergraduate degree in architecture from a program accredited by the National Architectural Accrediting Board (NAAB) follow the Post-Professional Track 1, consisting of 36 credit hours to be completed in one year. All students in the program are required to undertake a thesis project as the culmination of each course of study at the School of Architecture. Students may have up to three outstanding electives by the time they begin their thesis semester.

Admission to the Master of Architecture Program is determined by an extensive portfolio review that examines evidence of creative work, academic success, and professional achievement. Students who have successfully completed the portfolio review process must meet the minimum requirements of an undergraduate grade point average of 3.0, a minimum of 24 graduate credits, and be recommended by the department for admission to the graduate program. When the academic record is 3.0 GPA, the applicant may take the GRE (minimum score = 600) to complete for admission.

NAAB Statement
The purpose of this study is to identify the professional Master of Architecture degree, hereinafter referred to as the Master of Architecture, as a professional degree in the field of architecture. The program must be accredited by the NAAB, which is the sole agency authorized to accredit architecture programs. In order to be accredited, programs must demonstrate that they meet the quality standards established by the NAAB.

Admission to the master of Architecture Program in architecture is determined by the National Architectural Accrediting Board (NAAB). In the United States, the National Architectural Accrediting Board (NAAB) holds the sole authority to accredit professional degree programs in architecture. The program must be approved by the NAAB in order to be recognized as an accredited degree. The Master of Architecture Program is recognized by the NAAB as an accredited degree program.

**Justification for Program Change:**

- Credit hour requirements: Reduction to 39 hours to reflect the credit requirements for similar Masters at FIU and similar Masters in Higher Education Administration.
- Change in professional studies requirements reflects trend in College of Education with foundational courses more tailored to program area. EDH 6608 will be replaced by EDH 7065 History of Higher Education.
- GRE elimination rationale:
  - Research conducted by the Educational Testing Service, which administers the GRE, find little predictive value in the test. According to the National Center for Fair and Open Testing, "In one ETS study of 12,000 test takers, the exam accounted for a mere 9% of the differences (or variation) among students' first-year grades. Undergraduate grades proved to be a stronger predictor of academic success, explaining 14% of the variation in graduate school grades. An independent non-ETS study found an even weaker relationship between test scores and academic achievement - just 6% of the variation in grades could be predicted by GRE scores" (NCFOS, 2001; http://www.wisconsintest.org/about/gre.htm).

COLLEGE OF LAW – NEW COURSE REQUESTS

(Note: The following Law descriptions will appear in the College of Law catalog which will NOT have a 200 space limitation)

LAW 7XXX  Community Development Clinic
Students enrolled in this in-house clinic will represent clients on primarily transactional matters involving nonprofit organizations and small business. The course is designed to meet two needs: to provide students interested in business law or community development with a clinical program that will teach them some of the practical and substantive problems of counseling small businesses and nonprofit organizations and to offer much needed legal advice to segments of the small business community and non-profit groups in Miami-Dade County who are often unrepresented because of the high cost of legal services. The course will involve a two hour seminar each week and work on cases. This clinic may be either one or two semesters and the students will provide counseling to small businesses on a broad range of matters such as choice of entity, contracts and tax. In addition, non-profit groups will be assisted whose mission is to promote community and economic development. The seminar will teach the necessary legal skills and knowledge involved in transactional work such as client-centered interviewing, legal analysis, drafting transactional legal documents, practice management, professional responsibility and various practice issues such as choice of entity and pre-incorporation, non-profit corporations and federal tax exemption. Students will also share developments and issues in their cases with other students during the seminar case rounds. A discussion of different cases will expose the other students to issues that may not arise in their cases and involve discussion of ethical concerns and other practice issues. Pre or Co-requisites: Professional Responsibility and Business Organizations.

LAW 7XXX  Florida Civil Practice
This course entails a study of Florida civil practice from the commencement of an action through final judgment.

LAW 7XXX  Sports and Entertainment Law
This course will focus on the application of various legal doctrines to sports activities, and the various complex contractual issues facing attorneys representing clients in the entertainment industry. Representative topics include regulation of amateur athletics, public regulation of sports activities, legal relationships and structures in professional sports, legal issues involved in representation of professional athletes, and issues arising in the production, distribution and exploitation of theatrical film and television properties and in the music industry.

COLLEGE OF LAW – COURSE CHANGE REQUESTS:

LAW 7285  New Title: Profesión Jurídica Comparada (Comparative Legal Profession)

LAW 7503  Change credits from 2 to: 2-3.
